**Subject:** SOM Discussion Last Week - Actavis

Hi Bruce,

Thank you for your time last week. As a follow-up to our discussion, I wanted to send you a sample report pulled from ValueTrak that summarizes customer buying patterns. The pharmacy used in this example is Westside Pharmacy who purchases only one Actavis product (Oxycodone). For the period in question, they order 6 bottles each day like clockwork.

This doesn't necessarily make this account suspicious, but it comes across the system as something to take a second look at. As stated last week, our access to this type of data is very new and we have not yet determined how it will be used. I believe it may have been Don last week that requested on occasion we share information (less the source they are buying from) in situations where a customer may be under investigation. We can talk more about how we can mutually help one another in the future. At the present, this information is still new and we're trying to get our hands around it.

Once again, thank you for your time. I am sure we will be in touch again in the future. Should you need anything, don't hesitate to give me a call.

Nancy
